

NOBLE METAL THERMOCOUPLE ASSEMBLIES

Noble metal thermocouple assemblies are for measurement of temperatures that range above that of base-metal couples, (to 3200°F (1760°C), or for more precise measurements at lower temperatures where the additional cost is justified. These assemblies come in a wide variety of ceramic primary protection tubes, and with ceramic or metal secondary protection tubes. All assemblies are pretested and ready to install.

Ordering Information

*Not available when ordering 9004.
 **Not available when ordering 9002 and 9003.
 ***Not available when ordering 9005.

NOBLE METAL THERMOCOUPLE ASSEMBLIES

NOBLE METAL ASSEMBLIES

Part No.	Style
9000	Noble metal assembly with General Purpose head.
9001	Noble metal assembly with Heavy Duty Screw Cover head.
9002	Noble metal assembly with Open Terminal head.
9003	Noble metal assembly with Open Terminal head and 1" NPT mounting thread.
9004	Noble metal assembly with General Purpose head and Ceramic Primary tube, Inconel 1/2" I.P.S. Secondary tube.
9005	Noble metal assembly with Heavy Duty Screw Cover head with Primary and Secondary ceramic tubes.
